ASSA Performer System Requirements - 2009-01-28

A personal computer with reasonable performance is sufficient for ASSA PERFORMER.

If other applications are used on the computer, their requirements must also be taken into account.

Processor	Minimum Pentium 500 MHz. 2 GHz or higher is recommended
Operating system	The ASSA PERFORMER is validated only for the following Microsoft Windows operating systems:

- Windows 2000 Professional, Service Pack 4
- Windows XP Professional, Service Pack 2
- Windows Vista Business, Enterprise and Ultimate
- Windows 2000 Advanced Server
- Windows Server 2003 Standard and Enterprise editions

The latest service pack for the operating system is required, unless other is specified above.

ASSA PERFORMER is validated to be used also in MS Terminal Services.

ASSA PERFORMER is not Unicode compatible e.g. only western character set (German ISO Latin) is available.

Area settings and language	Software is tested and approved into following countries and language settings:

    Swedish
    Great Britain / English
    USA / English

ASSA will not support installation and use of ASSA PERFORMER on other operating systems, countries or languages.

Hard disk space	75 MB for the ASSA PERFORMER software

250 MB for SQL Server 2005 Express edition and utility programs

200 MB for the database, for very large locking systems up to several GB.

RAM	Minimum 512 MB. If the programming key of the CLIQ locking system is used to its full capacity or the system contains thousands of locks, RAM must be increased to 1 GB at minimum. If Vista is used, RAM must be increased to 2 GB at minimum.
Display	Minimum resolution 1024 * 768

Screen setting 96 and 120 dpi

Interconnections	If CLIQ locking plans are handled with ASSA PERFORMER, USB connection port is used for the programming device.
Programs	Microsoft$^®$ Internet Explorer 6.0 or higher.

Microsoft.Net Framework 2.0 is included in installation package and installed automatically in setup.

Microsoft SQL Server 2005 Express SP 2 is included in setup for one user installation.

Microsoft SQL Server 2005 or SQL Server 2000, Standard or Enterprise edition with latest service pack must be installed separately and in advance for multi user installation.

In addition to internal address book, ASSA PERFORMER supports using

ASSA AB
