

# ASSA Terminal PD

Access at a distance

## Application

ASSA terminal PD is a communication interface for secure access and data transmission between CLIQ Web Manager and authorized administrators. The unit reads the event logs from the electromechanical user keys, sends programming missions to the setup keys, and can be connected to both PC's and tablet's with a USB port.

The basic idea of CLIQ technology is the creation of a lock system that retains a high level of security despite upgrades, modification or expansion. Even after many years of use and a constant flow of new tenants, new employees or changes that occur in the workplace, the safety level remains unchanged. Intelligent locking systems provide control over all keys and can be easily customized to fit any need.

CLIQ Remote takes access control to locking systems worldwide

## Features

- Electronic logon device for administrators
- Encrypts data with AES / DES Encryption
- Viewing event logs
- Flexible user management
- No battery
- Cloud (web) -based software
- Compatible with:
  - Triton CLIQ Remote
  - dp CLIQ Remote
  - dp CLIQ Classic
- EMC tested according to EN61 000-6-2, 3 (2001) (2003)
- For central administration
- Protection: Protected against dripping water, Not for outdoor environment.
- Environmental requirements, standards and labels: RoHS, CE, FCC
- Communication: USB 2.0 Micro-A
- Weight: 100g
- Temperature range - 40°C to + 80 ° C

ASSA ABLOY, the global leader  
in door opening solutions.

# ASSA Terminal PD

Access at a distance

## Function

Ease of use for administrators

- (1) Setup key is inserted into the left cylinder
- (2) The user keys are programmed in the right cylinder
