

ASSA Cylinder Accessory 256 Trio

Cylinder Accessories

Application

The cylinder ring is mounted over the oval cylinder on the outside of the door which gives a more aesthetically pleasing decorative door design. The ring also acts as the first barrier of defence for the cylinder.

Unlike previous cylinder ring designs this new model allows for the cylinder to protrude in various lengths. This facilitates a lower stock level for the customer, whilst also lowering the risk of selling the wrong height to the consumer.

The primary focus group of the new cylinder ring is the private consumer (i.e. DIY-outlets).

Feature/function

For use with Scandinavian Oval cylinders
Available in the following finishes:
